CUSTOM-BUILT FOR B2B LINEN OPERATIONS

Your laundry. Your data. Your app.

Replace paper gate passes and month-end Excel chasing with one simple app: a mobile gate pass for your workers and a live dashboard for your office, running inside your own company Google account.

Dual-signed gate pass | Hotel-wise linen balance | Live revenue & stock | Your format | Set up in days

1 What the app does

Mobile gate pass

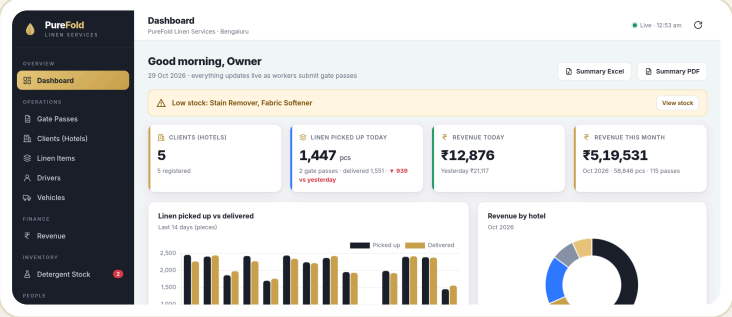

- Driver, vehicle & hotel drop-downs
- Soiled picked up vs fresh delivered
- Auto hotel-wise running linen balance
- Two on-screen signatures: laundry man + hotel rep
- Numbered, timestamped PDF shared on WhatsApp / email

Live office dashboard

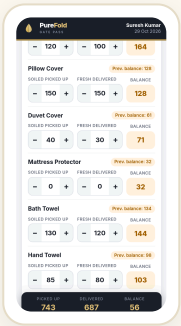

- Clients and daily linen picked up / delivered
- Detergent stock with low-stock alerts
- Daily & monthly revenue, by hotel
- Employees, drivers and vehicles
- Every report downloads as Excel or PDF

Role-based access

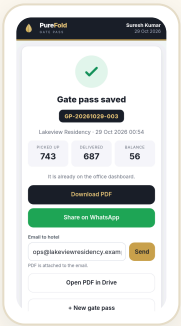

- Sign in with Gmail: Owner / Admin / Worker
- Workers see only the gate pass
- Workers cannot edit a submitted pass
- Rates and revenue stay with the office
- Runs on Google Workspace / Google Sheets

Hotel-wise balance

Saved & shared

2 Typical software vs Zappr

	Typical laundry software	Zappr Laundry App
Built for	Mostly retail dry-cleaning counters and walk-in orders	B2B hotel & hospital linen, pickup and delivery runs
Proof of handover	Order receipt or invoice	Dual-signed, numbered, timestamped gate pass PDF
Linen balance	Per order, often tracked separately	Automatic running balance for every hotel
Your process	Fixed screens and templates	Customised to your own format and items
Where data lives	Vendor's servers	Your own company Google account
Running cost	Recurring monthly subscription	Low: runs on Google Workspace / Sheets
If you move on	Export options depend on the vendor	No lock-in; export to Excel / PDF anytime

KEY HIGHLIGHT · DATA OWNERSHIP

Your records live in your own company Google account.

The app and every gate pass, signature, rate and report are stored in your company's Google Sheets and Google Drive. Not on Zappr's servers. You own it, you control who sees it.

Workers' phones
Fill & sign gate passes

Your company Google account
Google Sheets + Drive · Google's security · 2-Step Verification

←

Your office
Dashboard, reports, Excel / PDF

- **You own the data.** It sits in your Google Sheets and Drive, under your account.
- **You decide who has access.** Add Owner, Admin or Worker roles yourself.
- **Nothing stored on Zappr's servers.** Your records stay in your account.
- **Signed, timestamped records.** Each pass is numbered with both signatures.
- **Protected by Google's security,** with 2-Step Verification on your account.
- **Remove access instantly** when a staff member leaves.
- **No lock-in.** Export to Excel or PDF anytime; the Sheets are already yours.
- **Locked for workers.** Workers cannot edit a pass once it is submitted.

☁ With many typical cloud subscriptions

Your data sits on the vendor's servers, under the vendor's access and policies. If you stop paying or the vendor shuts down, getting your data out can be hard.

⚡ With Zappr

Your data sits in your own Google account, under your access and your rules. Stop working with us any time and everything stays exactly where it is: with you.

Our recommendation: use a dedicated company account

Set the app up on a company Gmail or Google Workspace account (for example **ops@yourlaundry.in**), not a personal one. Turn on 2-Step Verification. That way the business keeps its records even when people change roles.

3 Up and running in days

01
Understand your format
Your hotels, linen items, rates and current gate pass layout.

02
Customise & set up
We configure the app in your company Google account.

03
Train your team
Workers sign in with Gmail and start on their phones.

04
Go live
Office sees every pass, balance and rupee live.

Built by Zappr ⚡

Custom business apps from Bengaluru. Let us show you the app with your own hotels and linen items in a short demo.
